APPENDIX

A PRE-STUDY SURVEY FROM PART 1 OF THE STUDY

- (1) How would you describe your own writing? What makes your writing unique? Can you point out some unique characteristics (e.g., tones, voices, styles, features, etc.) in your writing? [Open text response]
- (2) Do you have any prior experience co-writing with any AI tool (ChatGPT, Grammarly, Jasper AI, Peppertype, Anyword, etc.)? If yes, please elaborate. [Open text response]
- (3) Do you use other tools, resources, materials, etc. to support your writing process? If yes, please describe them. [Open text response]
- (4) Is using these other writing support tools/resources any different from using an AI writing assistance tool? If yes, how so? (Please put n/a in the field if you do not use other forms of writing support.) [Open text response]
- (5) How would you define authenticity in writing? What does it mean to you as a writer?

- (6) Please submit a short piece of text (200 words) that you have written in the past. The text should represent your unique, authentic "voice" in writing.

B INTERVIEW PROTOCOL FOR PART 1 OF THE STUDY

B.1 Intro/warm-up questions

During the intro session, we asked participants to elaborate further on their responses in the pre-study questionnaires, particularly their perspectives on authenticity in writing.

- What are the unique characteristics (tones, phrases, styles, voices, etc.) that make your writing unique?
- What is your experiences co-writing with AI tools?
- What is your definition of authenticity in writing?
- Based on your own definition of authenticity, would you consider co-writing with AI as “authentic”?
- Would you want to preserve your unique characteristics in writing when you co-write with AI?
- How is using other non-AI tools to support writing similar to / different from using AI tools to do so?
- What does "good writing" mean for you?

B.2 Questions after each AI co-writing session

After each AI co-writing session, we asked participants the following questions. We asked the same set of questions for the personalized and non-personalized session.

- What was your overall experience co-writing with the AI tool?
- Does co-writing with AI have an effect on your writing *outcome*?
- Does co-writing with AI have an effect on your writing *process*?
- How did you feel about being affected by the AI writing tool?
- After co-writing with AI, does that change how you think about authenticity in writing?
- After co-writing with AI, do you consider co-writing with AI as authentic writing?
- Does co-writing with AI affect your authenticity in writing?
- Did you do anything to prevent AI from affecting your authenticity in writing?

B.3 Final Thoughts

After participants completed both AI co-writing sessions and responded to those above-mentioned questions, we then revealed to them the difference between the two sessions (i.e., personalized or not) and asked the following questions:

- Does the personalized AI tool pick up your unique voice, tone, style, etc. in writing?
- Do you prefer co-writing with a personalized or a generic AI tool?
- Is this the right amount of “personalization”?
- How will you select writing samples to personalize your AI writing tool?
- Does co-writing with a personalized AI produce more authentic work?
- Does co-writing with AI change how you think about authenticity in writing?
- How might your readers react to the idea of you co-writing with an AI?
- Do you have any concerns about writing with a personalized AI tool?
- Are there other ways that AI can support authenticity in writing?
- Are there other ways that AI can support creativity and good writing?
